

**upflow**

**360° Water & Wastewater Treatment Service**

Design ▶ Regulatory ▶ Execution ▶ Maintenance

[www.upflow-tec.com](http://www.upflow-tec.com)

# Dedicated to Your Peace of Mind

Upflow delivers the total water and wastewater treatment package – including regulatory consulting, securing all permits from the authorities, tailored system design, project execution using advanced technologies, facility operation and maintenance, and a comprehensive warranty with a single point of contact for all your needs.

## Cutting-Edge Technologies & Execution

Upflow stands at the forefront of water and wastewater treatment, investing significant resources in the research, development, and sourcing of diverse solutions.

**Upgrading treatment facilities**

**UFT modular dairy effluent treatment system**

**Gravitational sedimentation system**

**Aerobic treatment system**

**Anaerobic treatment system**

**Solids separation systems**

**Aeration and mixing systems for treatment lagoons**

**Fixed and moving bed bioreactors**

**Micronic filtration for effluent and sludge**

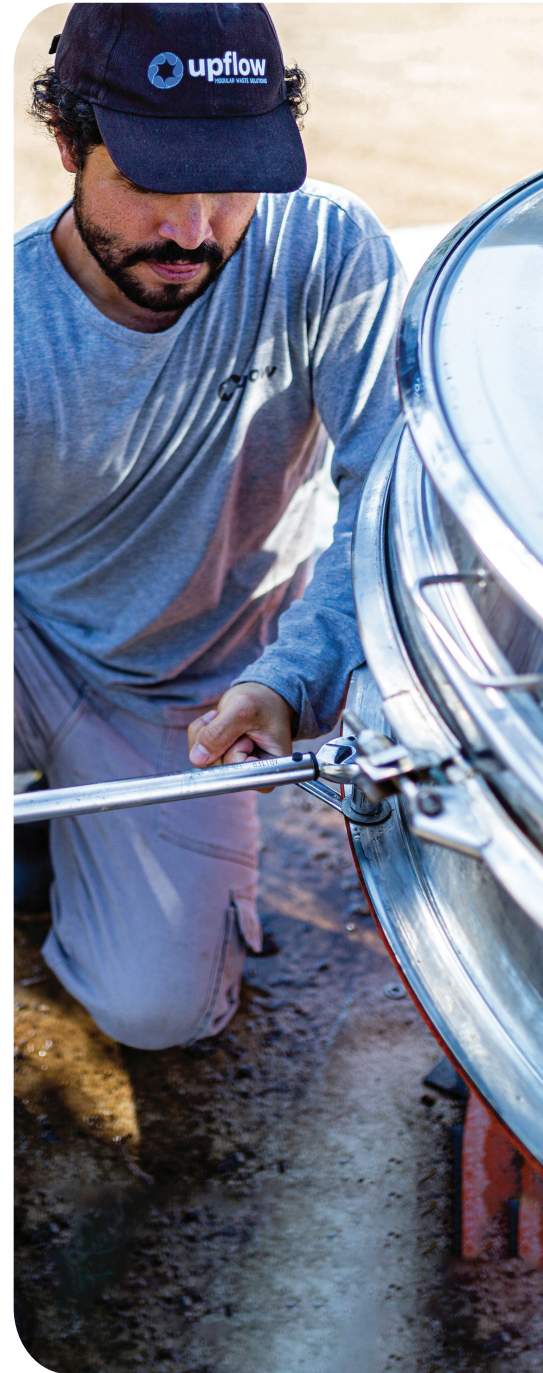

# Leading the Market with a 360° Solution

Why pay separately for regulatory consulting, sewage consulting, facility design, piping work, electrical work, maintenance, and parts warehousing?

Upflow has the know-how, the experience, and the ability to give you everything: from concept, to execution, to service.

## One Provider, One Point of Contact.

### On-Call Maintenance Service

Water and wastewater treatment systems require attention and responsiveness. In order for your facility to operate smoothly and continuously, we offer both periodic preventive maintenance and on-call repairs by our trained response team.

# One Phone Call **for All Your Needs**
